Our Clients

A team of AI experts specialised in Aerotech: from MRO to drones, we deploy concrete and rapidly operational solutions.

MRO

Maintenance, Repair, Overhaul

Parts & Manufacturing

Spare parts & production

Operators

Commercial airlines

FBO (Fixed-base Operator)

Ground handling & services

Defense & Security

Military & government aviation

Drones & UAV

Unmanned aircraft systems

Aviation Training

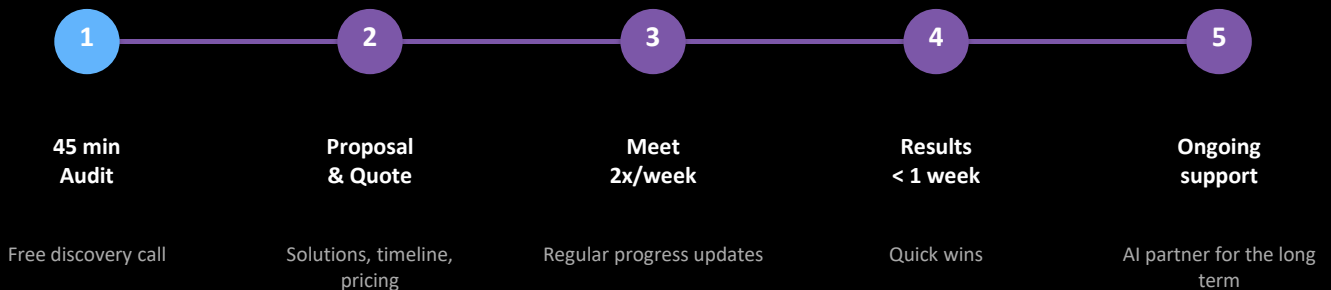

Aviation training centers

Freight & Cargo

Logistics & air transport

Our approach

Structured support, from the first contact to lasting results.

Our clients choose us for our sector expertise and our ability to deliver measurable results in less than a week.

Our Solutions

Ready-to-deploy or fully customized solutions based on your needs.

Ready to use

The most widely used solutions in your sector

Automated workflows

Pipelines adapted to your processes

End-to-end automation

Tender / RFP management

- Automated responses to calls for tenders
- Proposal generation

Document digitization

- Scan → searchable & indexable
- Automatic classification

Chatbot

- Internal use & team support
- Client interface

Tailored

Developed around your processes

Custom integration

Connection to your existing tools

APIs, ERPs & internal systems

AI dashboard

- Finance, inventory, operations
- AI analysis & commentary

Bespoke AI agents

- Built for your business
- Trained on your own data

Data pipelines

- Collection, cleaning, enrichment
- Automated reporting

AI consulting & audit

- Strategy, roadmap, ROI
- Change management support

All our solutions build on your existing tools: no overhaul, no migration. We adapt to your environment.

Training

Delivered in person, ideally, or remotely — adapted to your sector and level.

Fundamentals

2 hours to a full day

In person or remote · Entire team
Ideal for a first AI immersion

Advanced

2-day training

In person or remote · Technical teams
Ideal for advanced users

What AI can and cannot do

Hands-on use of tools deployed at your company

How AI fits into your workflows

Prompt engineering

Prompt engineering

Ready-to-use AI agents for your team

Concrete aerospace case studies

Integration into your daily workflows

Overview of available AI tools

Practical exercises as a team over 2 days

Group Q&A session

Value creation from the very first session

All our training sessions are customizable based on your business context, your tools, and your team's level. Contact us for a custom program.
